
DYNAMO
PLAYGROUNDS

Welcome to our catalogue.

Let it be a source of inspiration by guiding you in creating your play space design with our unique playground equipment.

Our inventive team has fresh ideas daily, some of which may not be included in this catalogue. To view more of our innovative and cutting-edge designs, please visit our website at dynamoplaygrounds.com.

Thank you for choosing Dynamo Playgrounds!

Our Promise 121

The Dynamo DX Difference

Dynamo is the world leader in innovative playground equipment.

Our stunning designs and masterful engineering ensure that every piece we build inspires the imagination of children everywhere.

Our primary mission is the creation of the safest, most durable and most fun playground equipment in the world.

About Us

For a quarter century, we've produced revolutionary designs that promise and deliver real adventure and excitement that fuels the children's 'Ship of Imagination'. Rope rockets that are out of this world, Mast Nets that reach the stars, Biggo swings that let you travel through space on flying saucers, and our new Ropes Courses which are runways to the next galaxy of creations, as Dynamo Playgrounds reignites the playground universe.

Never confined by playground industry norms, we took the lead and created a new standard of entertainment for children with our free form, artistic innovations. A new generation of revolutionary designs, meticulous attention to detail and a global search for the finest materials and methods have come together to create today's safest, most durable parks and playgrounds.

Dynamo stands apart from the rest, because Play Matters to us.

Dynamo Rope

Dynamo's engineers have created the safest, longest lasting, most attractive cabling in the playground industry. Using proprietary technology, they've infused the beautiful nylon or polyester cable coatings with UV protectants and flame retardant solutions in the extrusion process. They use these vibrant threads to weave a braid around at least 144 strands of galvanized steel to produce the play structure rope. This unique process keeps the ropes beautiful to see, soft to touch and stronger than any other cabling available.

The vibrant colours will immediately appeal to children of all ages, but the ropes will also feel just as good to the touch. A class 8 UV Colourfastness rating keeps the ropes looking new and the special nylon formula and unique weaving of threads means that Dynamo Ropes are resistant to fading, wearing and fraying for years.

Dynamo DX Connectors

Dynamo's metal junctions are the magic that enables Dynamo designers to create our ever-growing collection of unrivalled play structures.

The team examined every possible variation of plastic and steel connector, but many used connecting screws and pins that ultimately damaged the ropes in time. This exhaustive search resulted in the creation of the DX system of moulded high-density aluminum. Compressing with 120 tons of force gives them incredible strength and a beautifully smooth finish. This system eliminates any risk of friction at connection points and ensures that the rope's integrity and longevity are never compromised. Dynamo even created a portable machine press that can be used to repair a structure on site in the rare case of extreme damage.

Play Value

True play value has many factors. High user capacity with less space & materials used than traditional designs, universal availability in each structure, and long-term durability are only some of the key points that Dynamo features.

Play Attraction

Our exciting Dynamo games will appeal to children of all ages, from pre-school to teens, and crowds of them. You won't believe how many kids will come when you open your new Dynamo inspired playground!

Play Retention

Getting the children to stay outside and play is never a problem with our active and inclusive game designs. More fun than a virtual world, they will stay engaged for hours. Your only problem may be getting them home for supper.

Play Return

Kids can be fickle, but we guarantee children will want to go back and play on our Dynamo playgrounds again and again. Buyers of our playground equipment will always receive fantastic value for their investment.

> *"These Dynamo pieces are by far the best play value I have ever seen, well worth the money!"*
>
> **Greg B.**

Symbols of Fun

Throughout our catalogue, you will see a number of symbols used to help show you the features of our products.

Signifies products are IPEMA Certified to ASTM F1487

Signifies products are IPEMA Certified to CSA-Z614

Signifies products are TUV Certified to EN 1176

Signifies products are accessible.

Picturing Fun

These symbols will describe the types of activity and benefit which are offered by each product.

- Imagination
- Inclusive
- Interactive/ Social
- Swinging
- Jumping
- Climbing
- Balancing
- Upper body Strength
- Agility
- Coordination
- Fitness
- Spinning

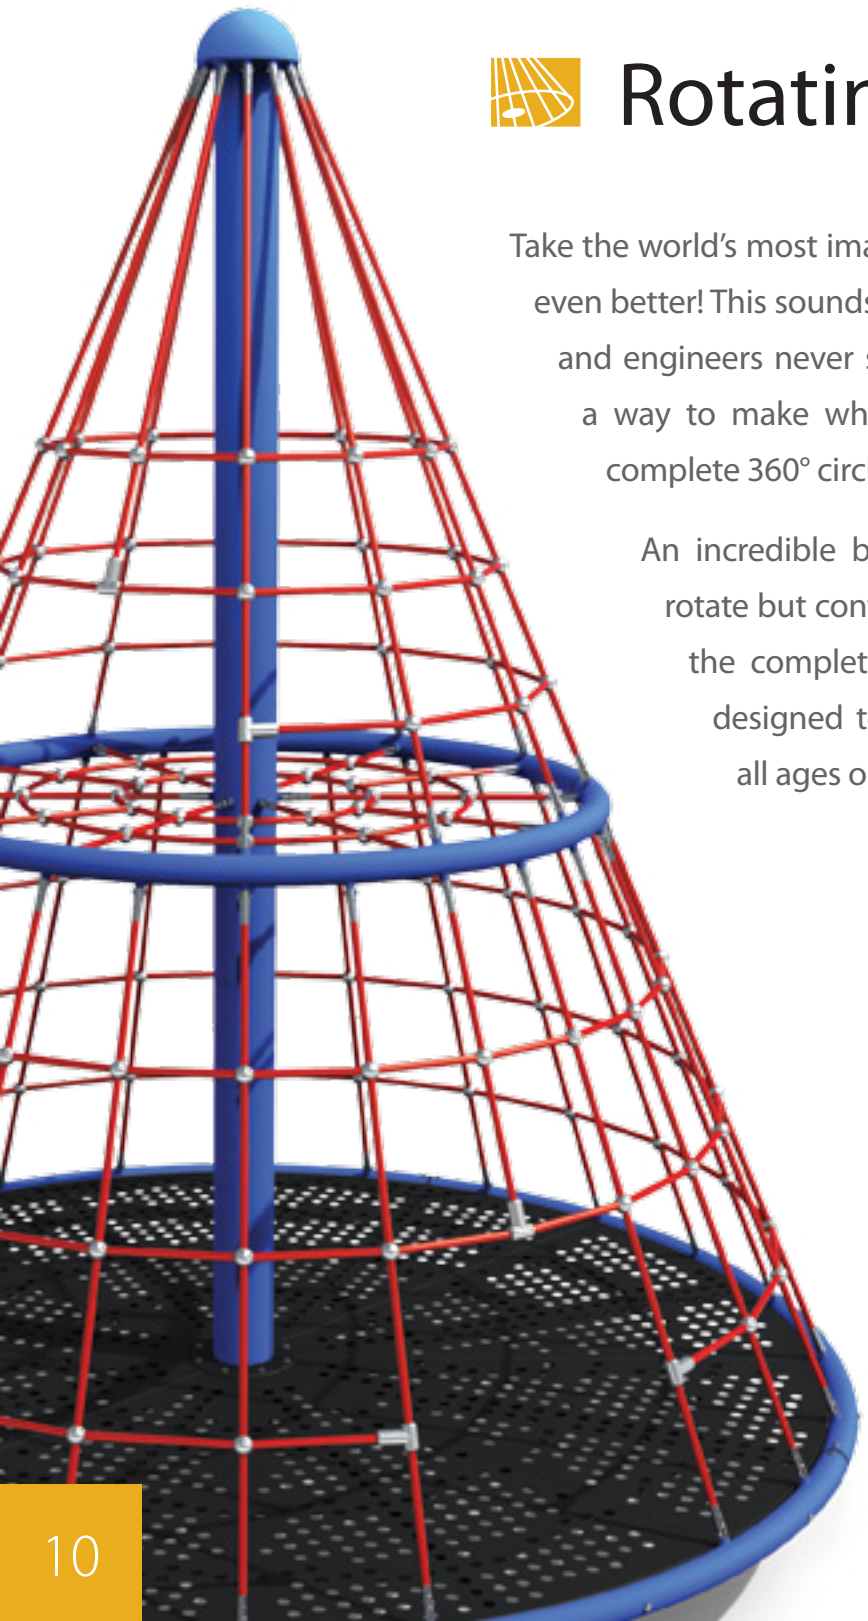

QR codes will quickly take you to more information about our products on dedicated web pages. Scan them with your mobile device to see more.

If you need an app to read them, you can get one here:

Rotating Climbers

Take the world's most imaginative play structures and make them even better! This sounds like a tall order, but Dynamo's designers and engineers never shy away from a challenge. The result is a way to make whimsical rotating climbers spin safely in complete 360° circles.

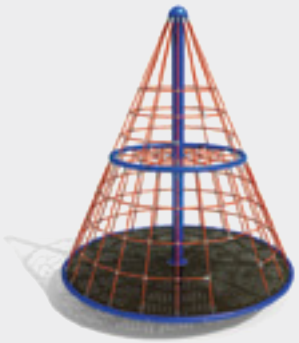

An incredible bearing system that allows the deck to rotate but controls the speed at the same time ensures the complete safety of the structure. Elements are designed to provide equal enjoyment for users of all ages or abilities.

Apollo™ with Floor

DYNAMO

Biggo Swings

The best things in life are shared, so Dynamo took a traditional playground favourite and made it better.

This fully accessible Biggo Swing can be used by up to four children of any age at a time! All sharing the wonderful sensation of safely soaring through the air in our unique parabolic arc. The dish-like swing conjures up shared images of soaring space ships or flying carpets, all while helping children of all abilities develop their balance, equilibrium, and social interaction.

Carefully crafted from stainless steel for a sleek, modern and long-lasting connection.

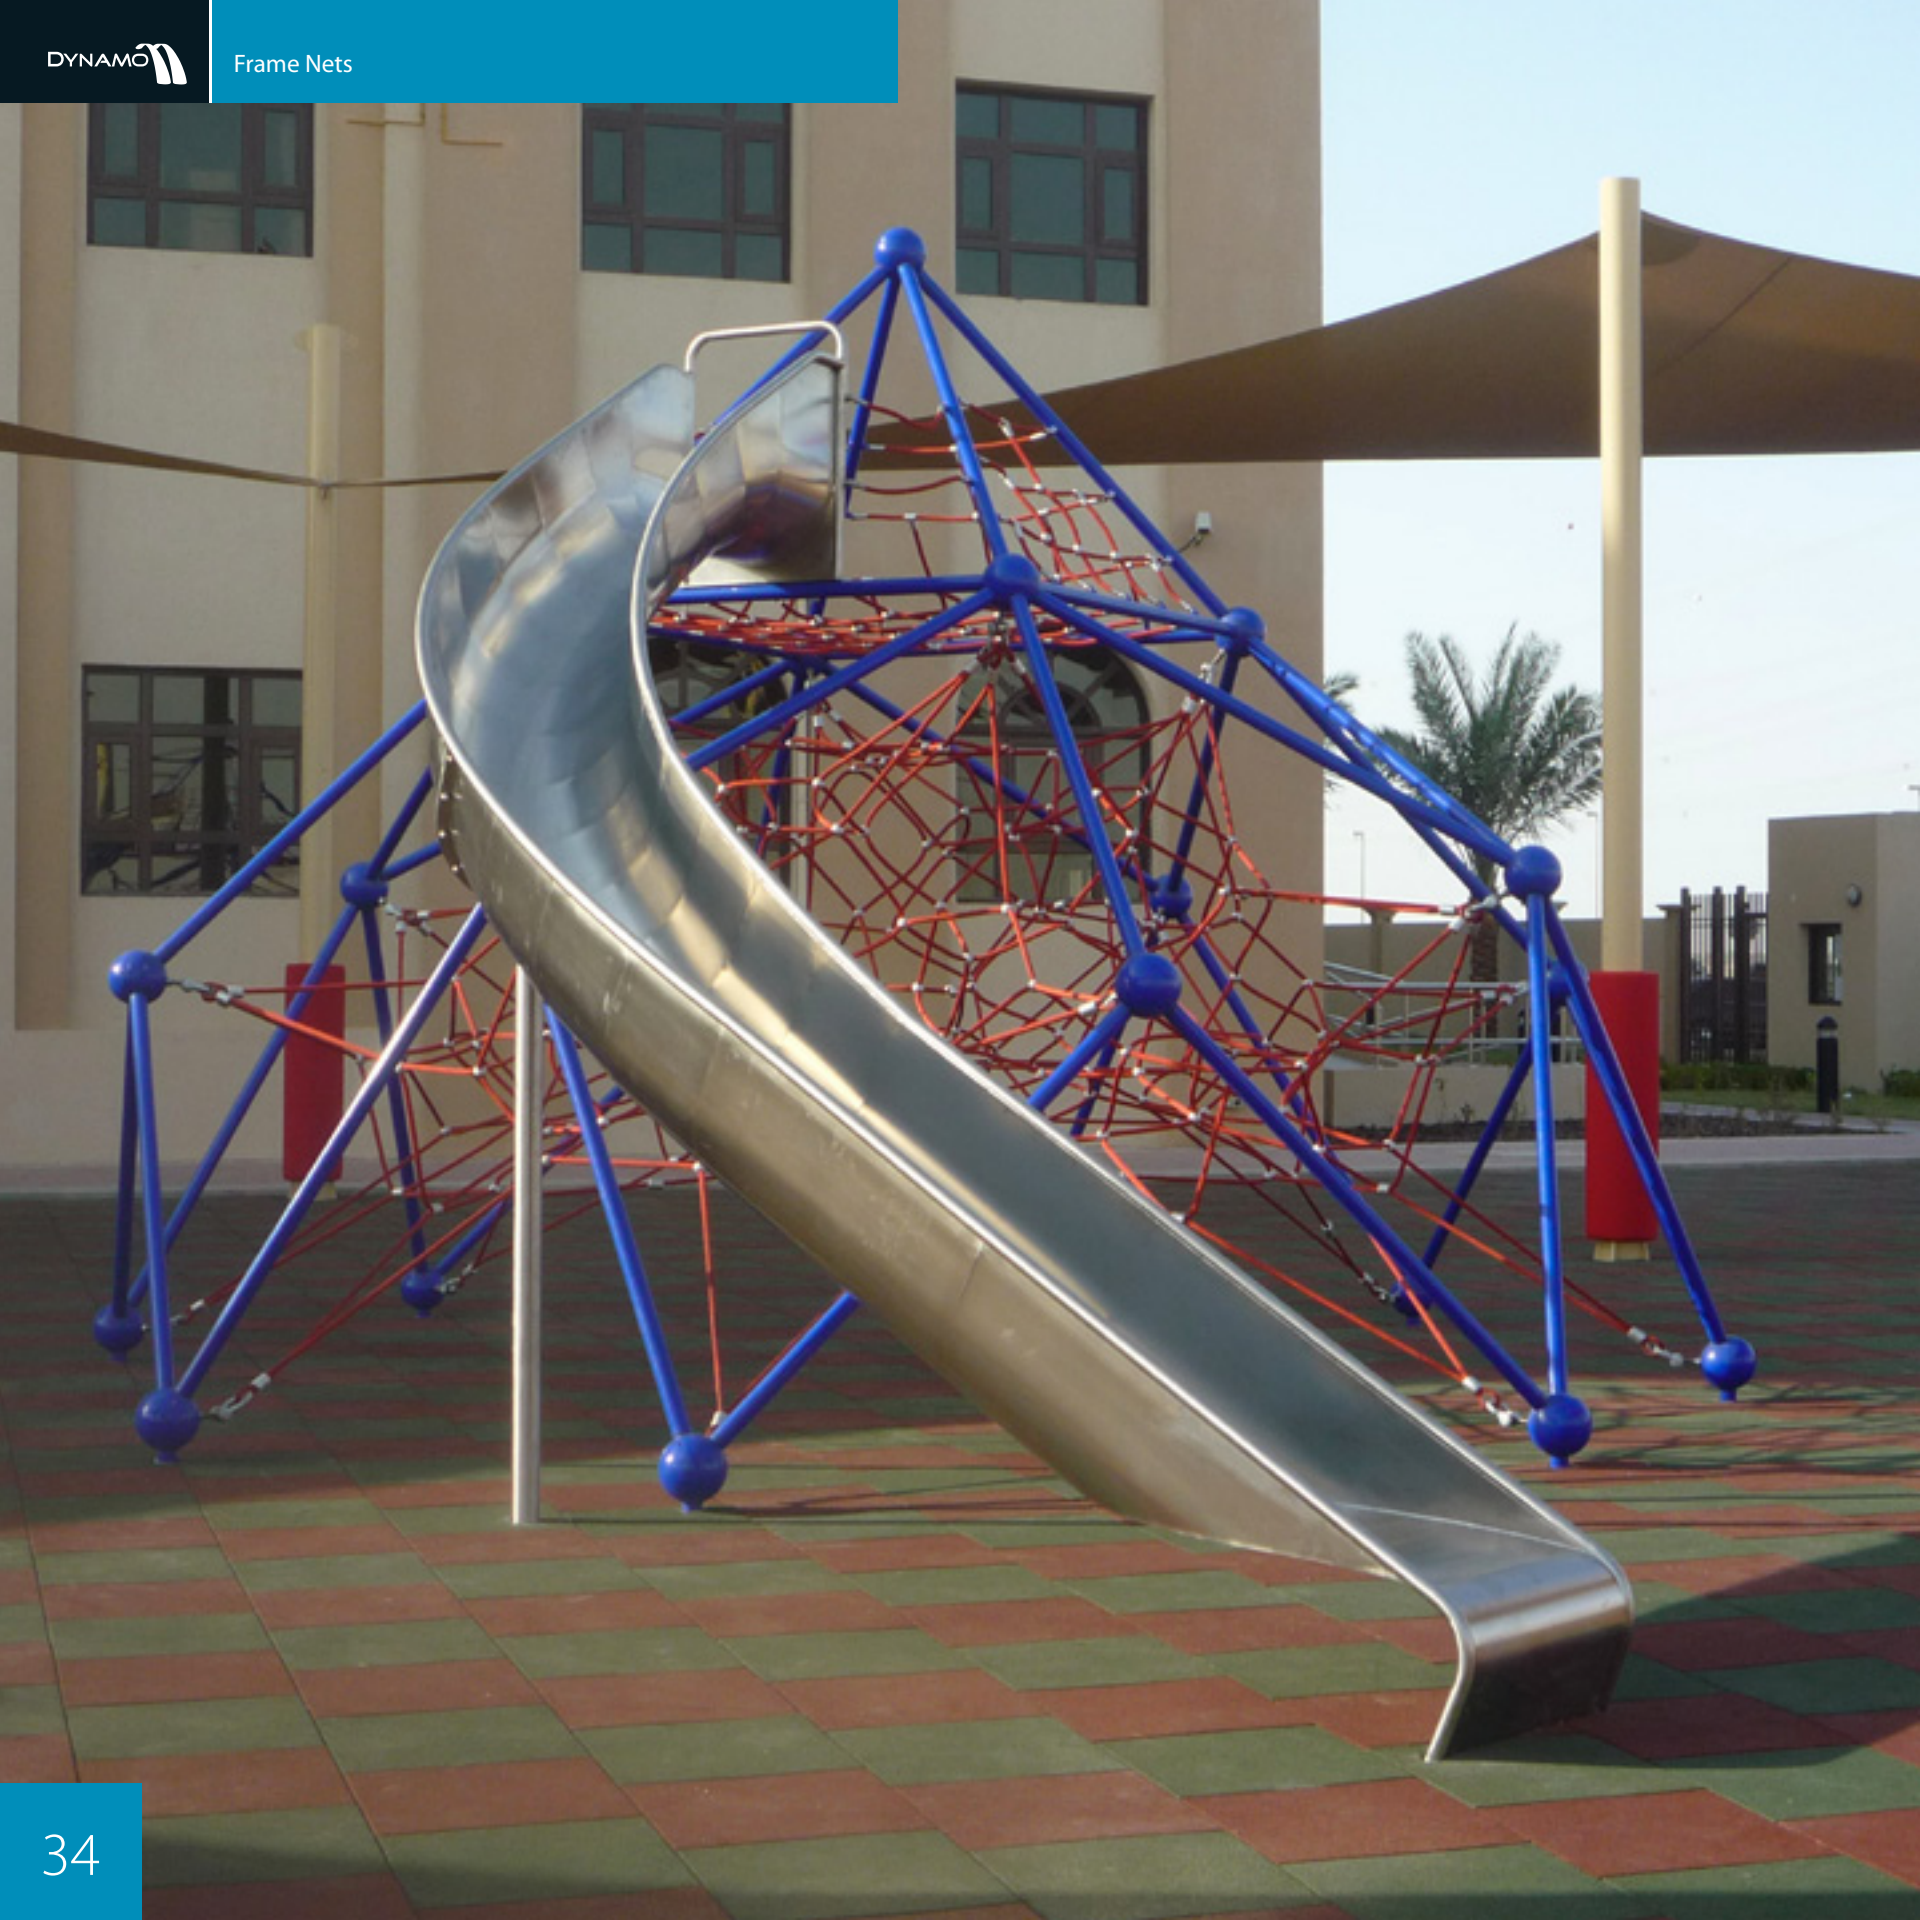

Frame Nets

Dynamo's frame nets are the perfect complement to any playground design. Built on heavy gauge steel frames using Dynamo's unique rope construction; these play games are the ideal place to practice balance and coordination while battling intergalactic aliens or climbing the walls of a grand canyon. Like everything Dynamo builds, these structures will allow generations of adventurers to complete their quests.

Rocks and Themes

The majestic beauty that nature carves out of mountain landscapes leads us all to dream of exploration and discovery. The Dynamo team has brought these wonderful rock formations to the playground. The tough Glass Fiber Reinforced Concrete (GFRC) construction ensures that Dynamo ROCKS!™ will keep their beauty almost as long as the real mountains they are modeled from. Your little relic hunters will live out their dreams and discover the wonders of the wilds in the safety of your neighborhood park.

Nature Play

Challenging climbing trees where mystical creatures nest, or a hollowed out redwood tunnel, is the fuel for fantasy that makes childhood play so magical. Dynamo's Nature Play is a safe series of strong, natural, long-lasting playground structures made of GFRC that use the beauty of nature to inspire children to climb and explore. Our Nature Play series is perfect for younger and intermediate climbers to hone their skills.

Ropes Courses

These custom designed ropes courses are innovative creations of free-form, multi-plane net climbers that have limitless possibilities for hours of amusement. Unlike traditional playgrounds with linear play movement, Dynamo keeps everyone entertained with nets that twist, turn, rise and fall in complex connected paths. Users climbing through these structures are offered to a play experience that constantly changes and is never the same twice.

Concepts may change and vary in size due to safety standards.

This artistic take to our Ropes Courses provides a free-form play experience in a continuous circuit that is a stunning centerpiece for a destination playground that will entice the community and visitors alike.

ROPES COURSES

Mini Splash

This creative sidewinder Ropes Course was designed to let children have fun, learn and unwind.

The Trillium encourages that inner-Olympian in kids, as they participate with each other in this innovative combination of play events.

Jellyfish

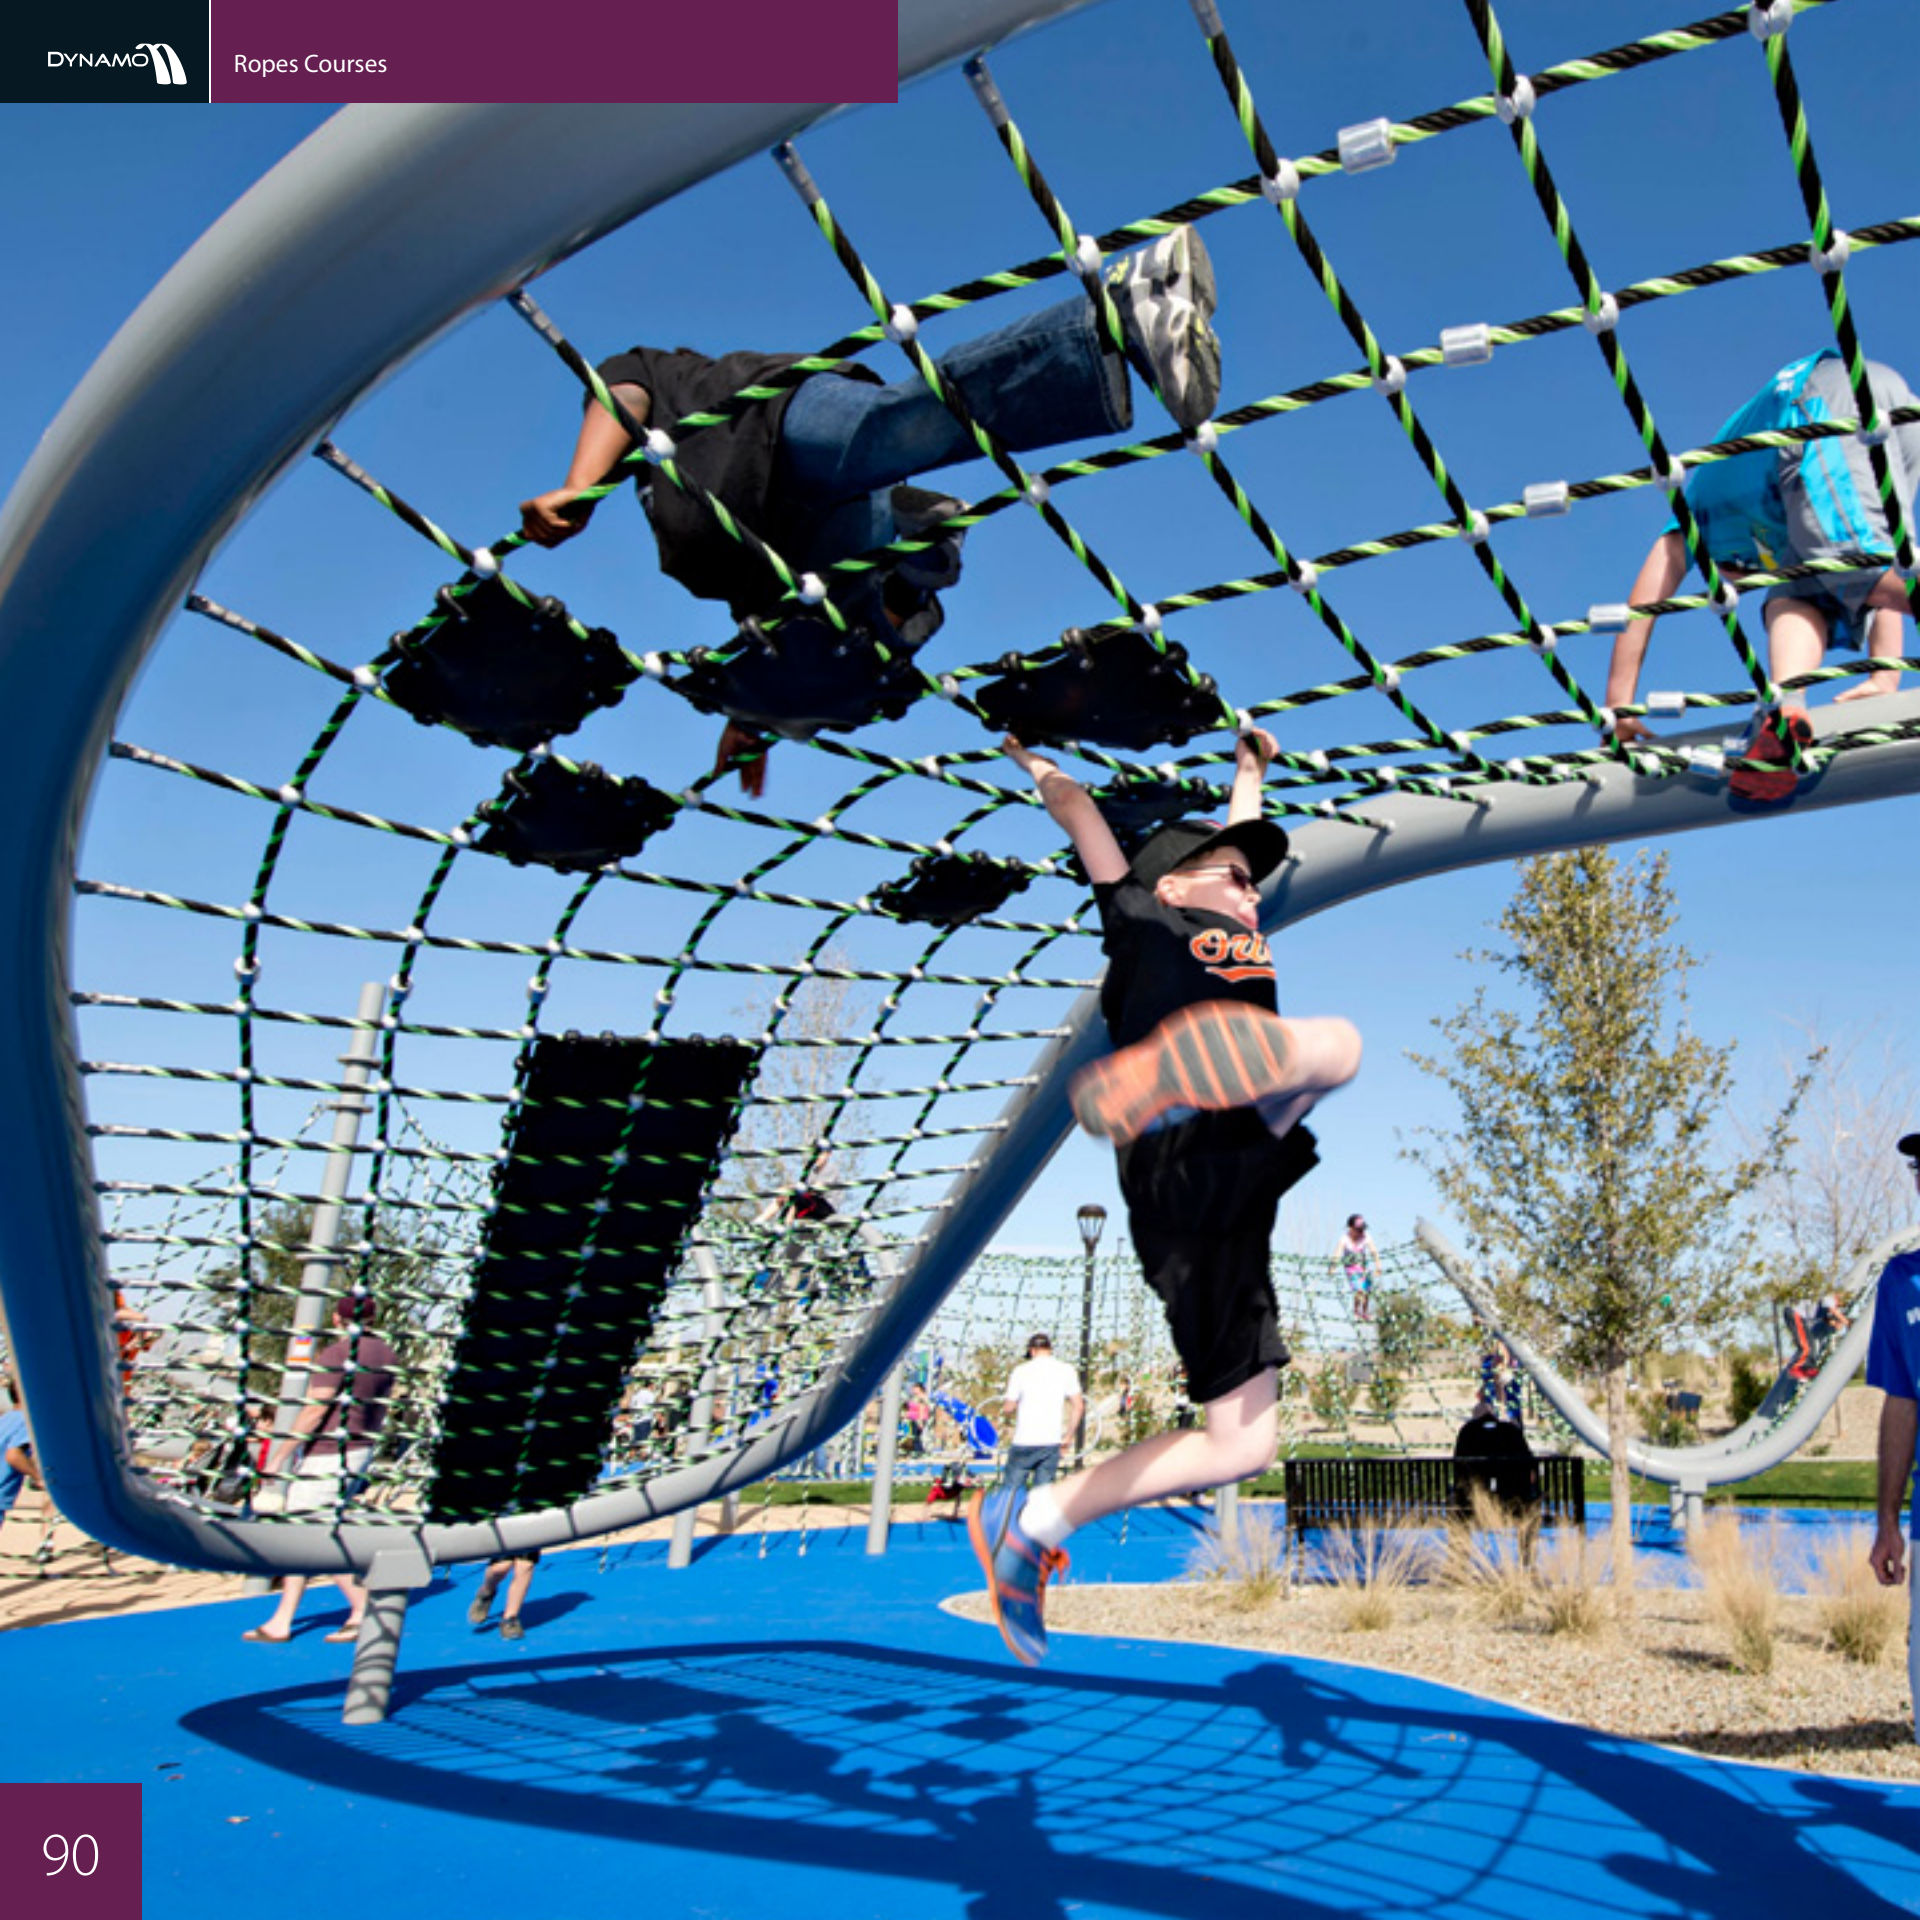

Imagine the fun they will have with this inventive combo of a racetrack Ropes Course with spinners in your play space!

Coral Reef

All your little submariners are going to love diving deep onto the Coral Reef that floats in the playground sea.

Get ready for the Rippling! Waves of fun are washing your way!

Beyond the shore, past the riverbend, there is a Canal that guides the children to endless fun!

Meander

What's around the bend? The answer is at the end of this beautifully designed meandering Ropes Course.

Stingray

Get ready! The Stingray will surround the children with waves of fun!

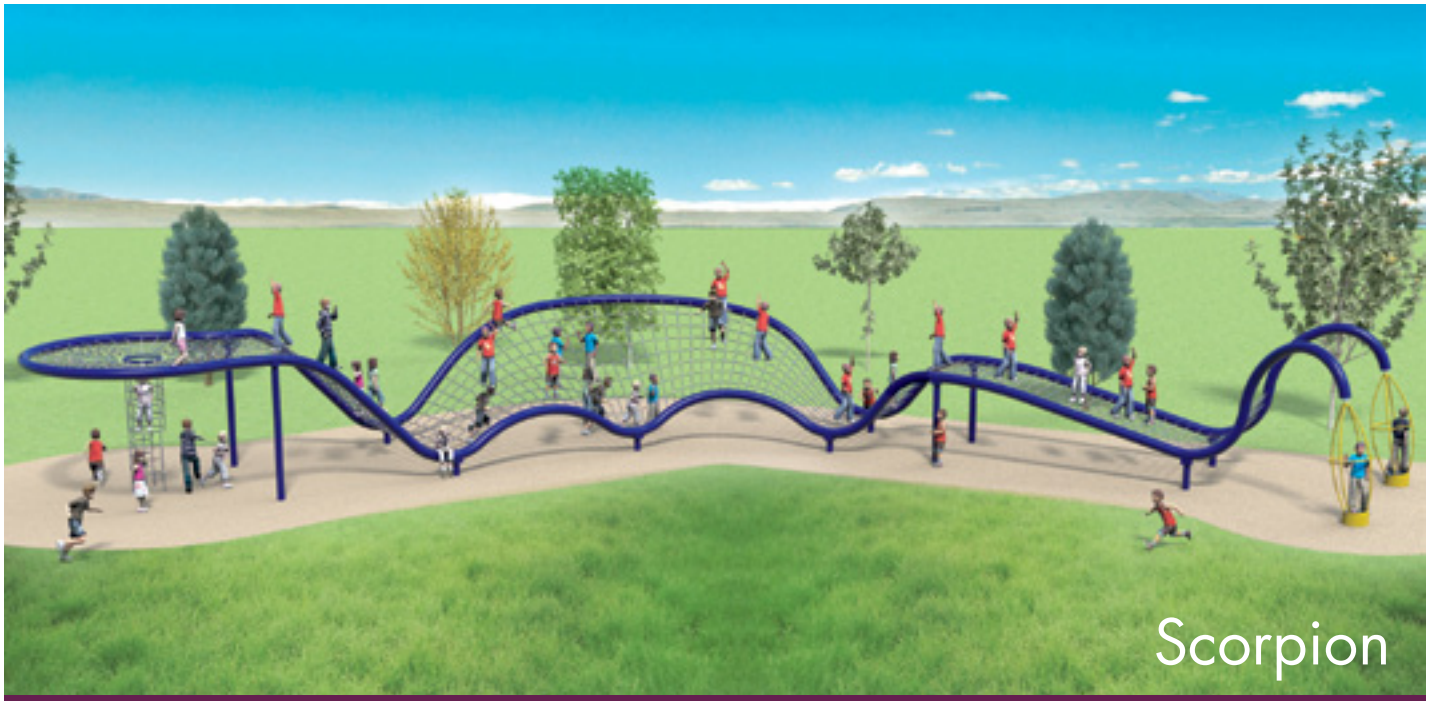

Ropes Courses can be anything in the mind's eye of children! Sailing away from the solid structures where they are told how they should play. Coast on imaginations, in this Little Boat.

ROPES COURSES

Little Boat

Scorpion

The Scorpion Ropes Course tingles with continuous enjoyment!

Pro Urba

Add spinners to any Ropes Course! Children are "pros" at creative play.

What's New?

We haven't even started yet! Dynamo's new and future projects always involve burrowing further down the rabbit hole, so look no further for your next custom project.

At Dynamo our playgrounds always hold hours of fun for childern of all ages, complete with Ropes Courses, swings, spinners and slides. Your park will be thriving with more children and families than any other typical playground.

With our innovative technology we will manifest your dreams into reality. The design here shows you that children in the community can play even after the sun goes down.

Let us get inspired together, and bring out the creativity in everyone with a Dynamo Playground.

Play Matters.

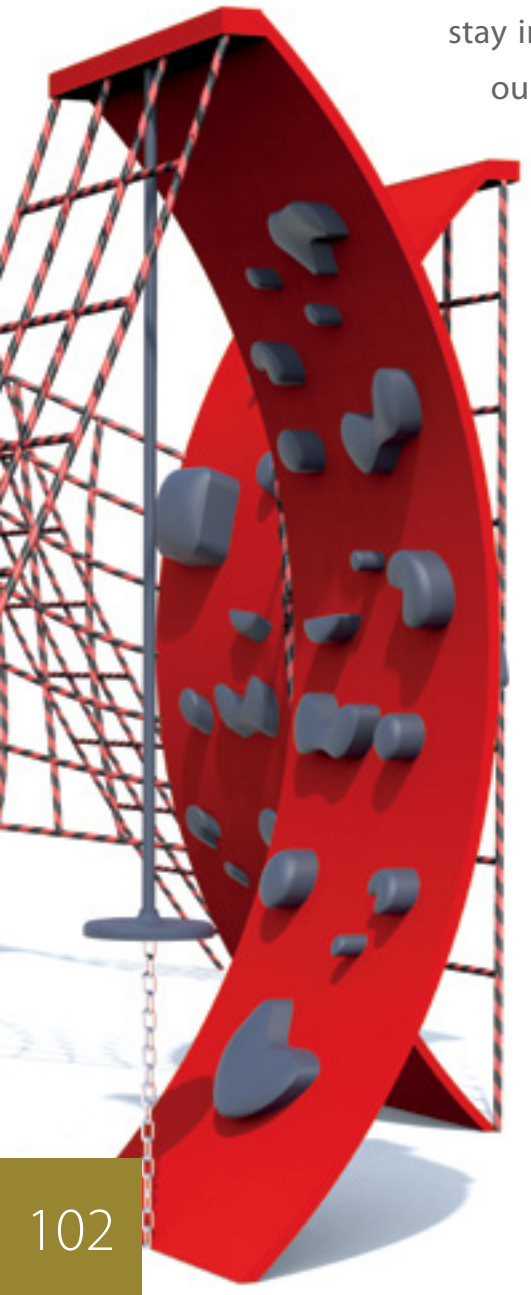

Creative Concepts

This section highlights our creativity. At Dynamo, our imaginations are always running in overdrive and we never stay inside the box. Whether it is a unique custom project, or our next production item, we have plenty of ideas for you.

These pages only have room to show a few, so be sure to visit our web site regularly to see all of our latest and greatest creations we have to offer. Let us inspire your creativity!

Concepts may change and vary in size due to safety standards.

What do you get when you combine Dynamo's Creative Concepts and children's imaginations? Hours of fun for everyone! These dynamic rope pyramids help children build coordination skills and encourages logical thinking, as their imaginations peak sky high!

As you can see, anything is possible with us! Experience boundless collections of play when you choose a Dynamo product. We're taking over the playground in a colossal way!

Snakes and Ladders

Watch out for the Cobra! When it sinks its fangs in you there's sssuper fun awaiting!

Twist and shout for joy as children wind up on this creative game! It can also be combined with other games to generate even more fun!

Children love to play and hide. Allow them do both as they 'Plateau' to the highest point in this enclosed jungle gym ropes course game.

Plateau

This design was created not only to shore up attention from children, but to navigate all to come together as one from near, far and wide with its artistic design. Let's get this Lighthouse shining in your park!

Lighthouse

Tight with space? No worries! *Innovation* is Dynamo's middle name! This long-lasting play area is bursting with great fun, but simple and compact for your site.

Bamboo Shoots

Lemongrass

Climbing games help increase coordination skills. This twisted Lemon Grass grows only at Dynamo Playgrounds!

Chaise

Get them out of those chairs and get them into this dynamic Ropes Course game!

This awesome game can be linked to any ropes course game! Or stand alone as the Uni-Link.

Climbing, jumping and wobbling all over! Bursting with fun in a seismic way!

Kids play experiences will never be the same, especially with this 'Speed Tunnel' concept design! The prospects of fun are endless

Speed Tunnel

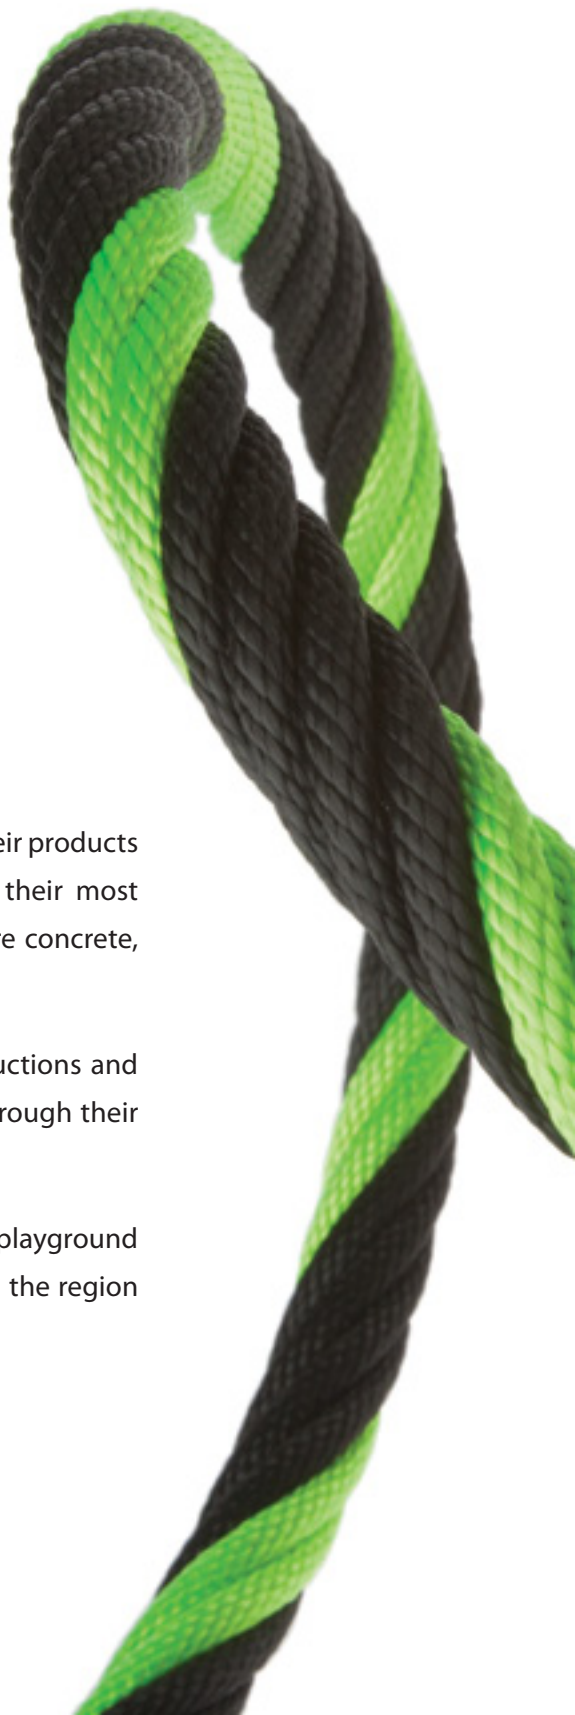

Innovation

Dynamo has become synonymous with industry leadership and innovation. As creators of the world famous Biggo Swing, the Quad Pods and key structural components such as Dynamo's DX Technology; Dynamo is reinventing the way children play. Inspired by kids, their playground equipment is certain to light up the faces of children worldwide.

As a pioneer in the rope play industry, Dynamo is always seeking out new ways to bring fun and excitement to the playground environment.

Installation

Dynamo Playground equipment is designed with the installer in mind. Most of their products require far less on-site assembly than many 'traditional' structures. Some of their most famous items like Rotating Climbers and the Classic Biggo Swing do not require concrete, a significant cost and time savings.

All of Dynamo's products are delivered with comprehensive step-by-step instructions and diagrams to carefully explain the most efficient assembly process developed through their extensive experience with installing in playgrounds all around the world.

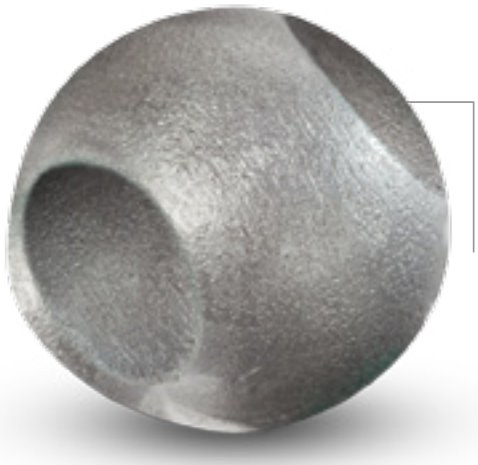

Dynamo Playgrounds recommends that all equipment be installed by licensed playground installers, trained and certified on the relevant playground standards in place in the region of installation.

Maintenance and Repair

Dynamo's unique tamper resistant connections make the structures virtually impervious to vandals. If ever one of these wonderful park creations does succumb to damage of any type, Dynamo has the ability to quickly and permanently repair it on site; returning it to "like new" condition.

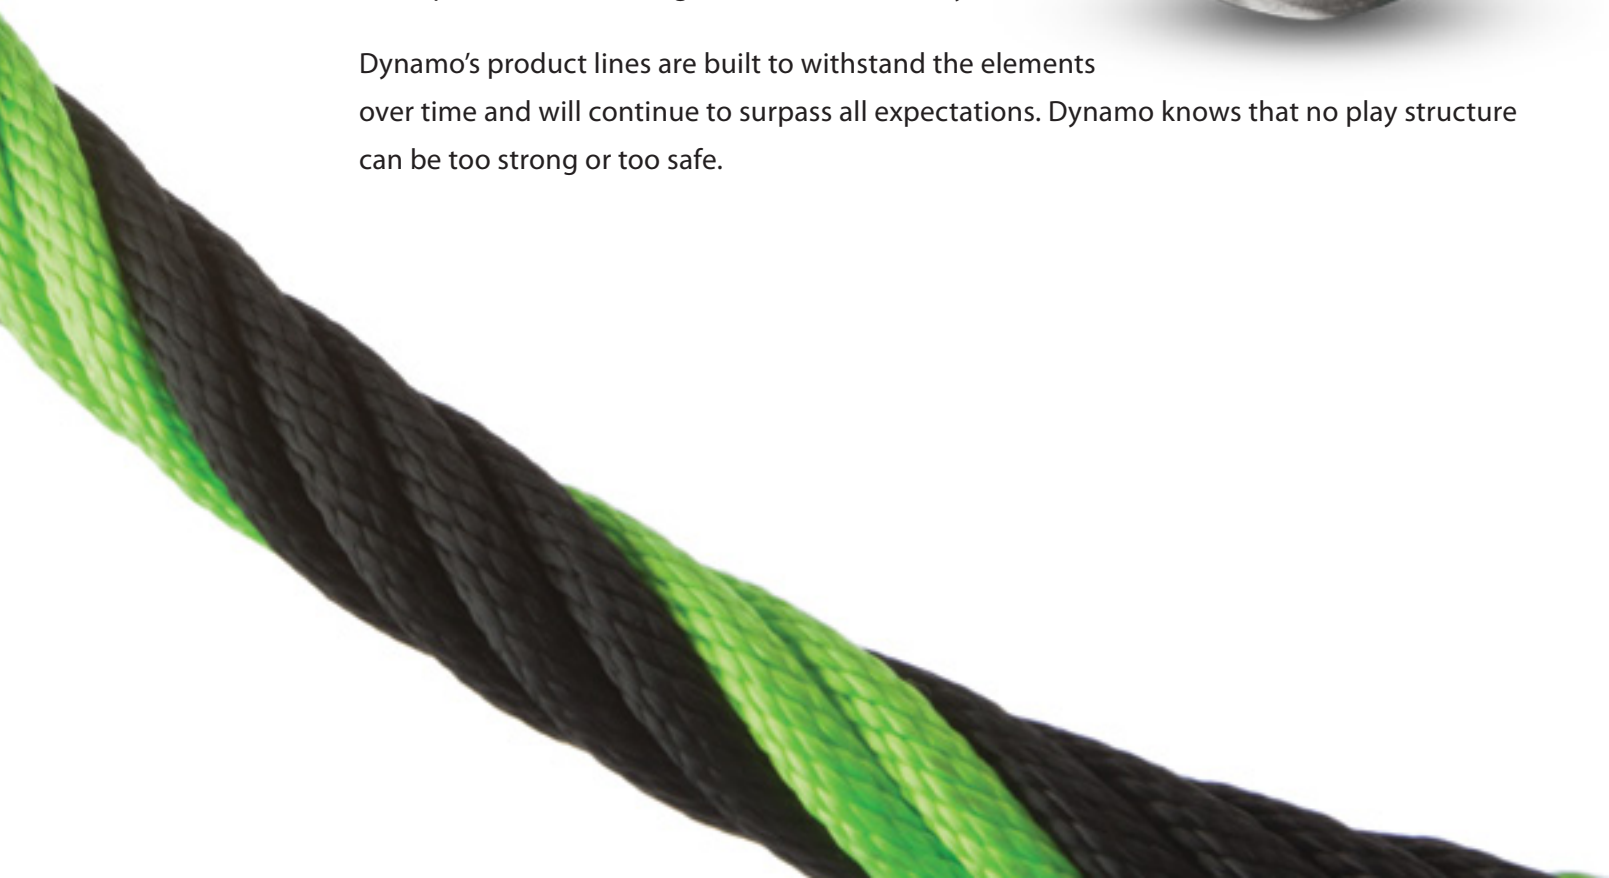

Engineering

Engineered for the children of today and tomorrow, Dynamo products meet or exceed industry safety standards. Dynamo embraces the precious trust that has been given to them by everyone who plays on their structures. Every child must be completely safe, nothing less. Dynamo DX Connectors combined with DX Rope creates the strongest nets in the industry.

The compressed and hand-finished aluminum ball knot holds together all of our nets and climbers.

Dynamo's product lines are built to withstand the elements over time and will continue to surpass all expectations. Dynamo knows that no play structure can be too strong or too safe.

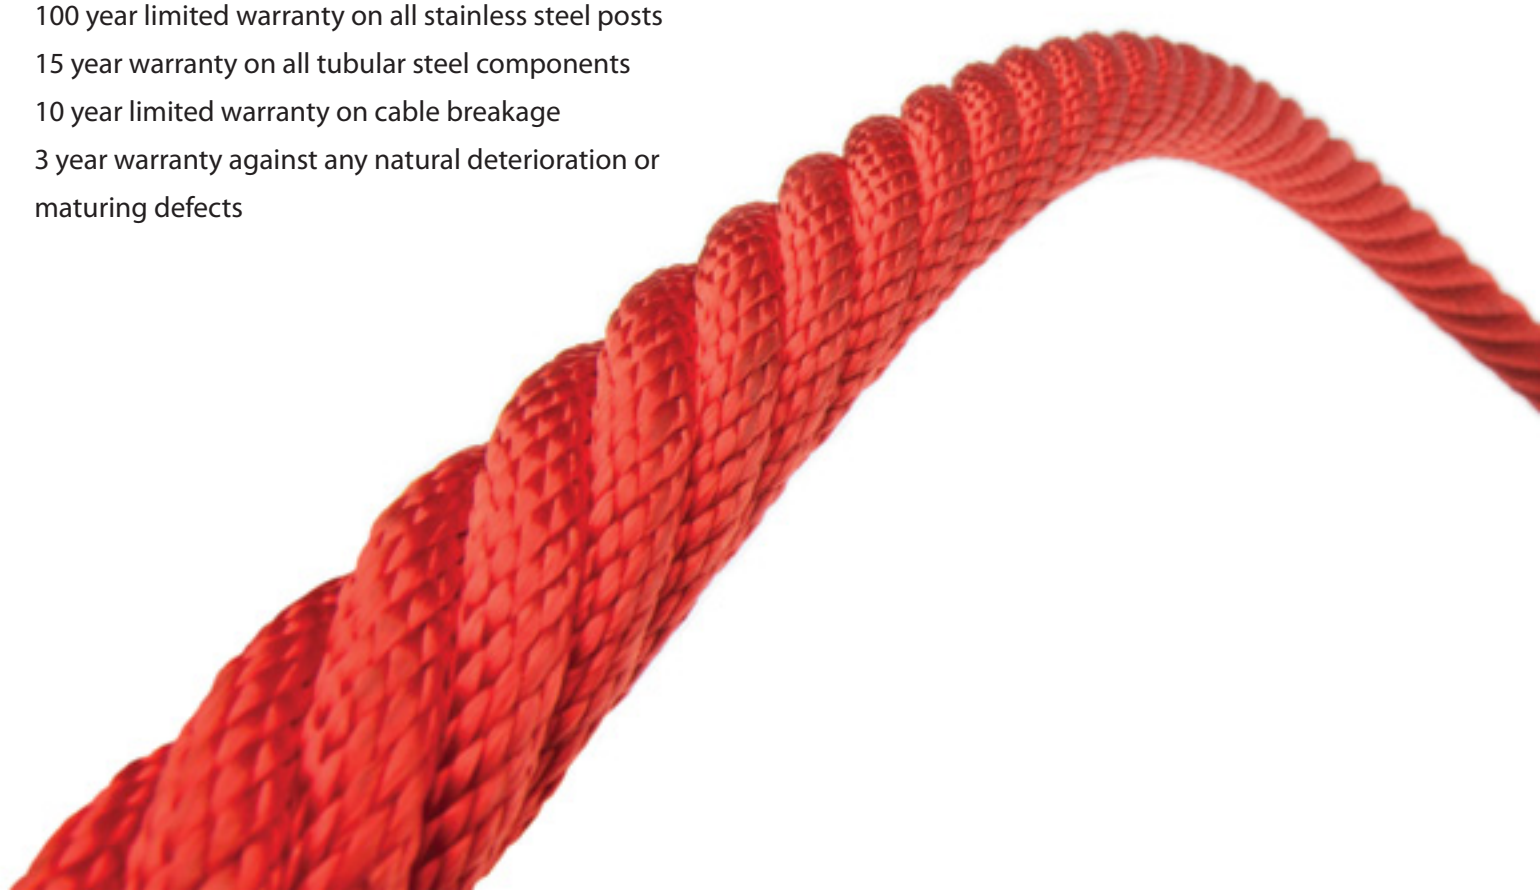

Quality

Playground equipment can never be "too" safe. So we create our products from the finest materials available anywhere. Dynamo DX technology uses the strongest ropes in the industry; with a minimum 144 strands of galvanized steel woven inside a unique nylon or polyester covering. We've also created a unique connecting system that uses compressed aluminum and stainless steel to make the structures even safer. Our structures look and feel amazing to the touch, and will endure the most playful of children. That is the Dynamo quality.

Warranty

When you take the time to design and build the best Playground Structures in the world, you have to stand behind them. So we've made sure that the Dynamo® warranty is exemplary;

- 100 year limited warranty on all aluminum parts
- 100 year limited warranty on all stainless steel posts
- 15 year warranty on all tubular steel components
- 10 year limited warranty on cable breakage
- 3 year warranty against any natural deterioration or maturing defects

Safety and Certifications

Dynamo has delivered playgrounds to over 50 nations worldwide. Our incredibly high standards have allowed us to exceed all safety certifications in every market we serve. Here is a partial list of the safety standards certification we've been awarded:

In the interest of playground safety, IPEMA provides a Third Party Certification Service whereby a designated independent laboratory, TÜV SÜD America Inc., (TÜV), validates a participant's certification of conformance to ASTM F1487, Standard Consumer Safety Performance Specification for Playground Equipment for Public Use, except sections 7.1.1, 10 and 12.6.1; CAN/CSA Z614, Children's Playspaces and Equipment Standards, except clauses 9.8, 10 and 11; or both. The use of the corresponding logo in the Dynamo Playgrounds catalogue signifies that Dynamo Playgrounds has received written validation from the independent laboratory that the products(s) associated with the use of the logo conforms with the requirements of the indicated standards. Check the IPEMA website (www.ipema.org) to confirm product certification. The use zone requirements in this publication are shown to ASTM standards. The requirements for other standards may be different. According to CSA, playground maintenance and inspection is a continuous and integral part of budgetary costs. The cost of inspection and maintenance shall be considered and incorporated into the budget at the time of design, purchase of equipment and installation (11.1.1 Budgeting).

The European Standard was developed by the European Committee for Standardization. The majority of Dynamo Playgrounds products have been designed to be TÜV certified by a third-party validator to EN 1176, the European Standard for Playground Equipment.

The American Society for Testing and Materials (ASTM) is a scientific and technical organization that is a major developer of standards for testing different types of materials. In 1993, the ASTM published "Standard Consumer Safety Performance Specifications for Playground Equipment for Public Use," designation F1487-93. ASTM is more technical than the CPSC. ASTM revised its old standard and published a new standard in 1995, 1998, 2001, 2005, 2007, 2011 and again in 2016.

The Canadian Standards Association (CSA) Nearly all equipment developed by Dynamo Playgrounds is certified to meet CAN/CSA-Z614, the Children's Playspaces and Equipment Standard, through IPEMA.

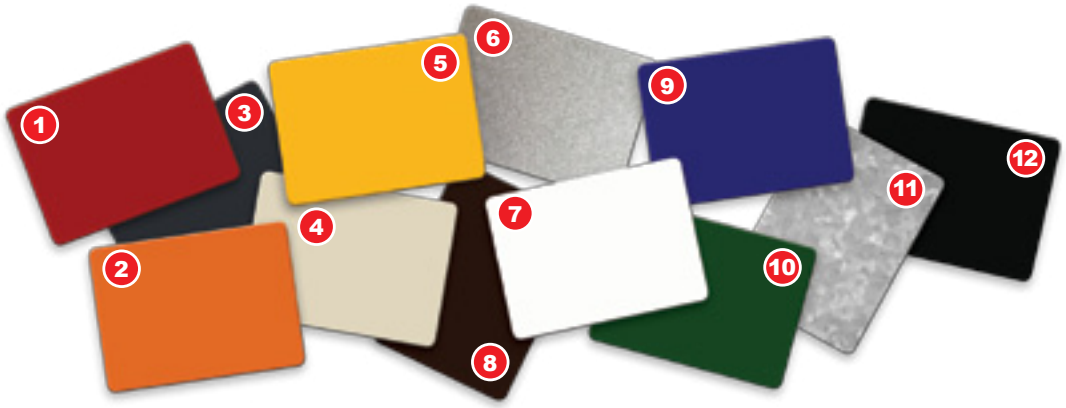

ISO 9001:2008 has a process-oriented structure, is customer focused and emphasizes continuous improvement in quality.

ISO 14001:2004 drives us toward operating in a manner that is environmentally conscious.

Colour Choices

Mix and match with these paint and rope colours to create your playground look. Our unique colour combination ropes provide an extra special twist.

Paint

1. Red 2. Orange 3. Charcoal 4. Tan 5. Yellow 6. Grey Aluminum 7. White 8. Brown 9. Blue 10. Green 11. Galvanized 12. Black

Rope

A. Brown, B. Blue, C. Yellow, D. Red, E. Green, F. Black, G. Evergreen, H. Liquid Fire, I. Dragon Tail, J. Licorice Twist, K. Neon Lights

Actual colours of products and materials may appear slightly different than pictured. Products are subject to availability and change without notice. Product specifications in the catalogue were correct at time of publication; however, product improvements are ongoing and we reserve the right to change or discontinue specifications without notice.

Our promise to you

When we look back at the playgrounds of our youth, we often wonder where all the fun went. Even though we remember the thrills and the endless hours of enjoyment, much of the equipment we played on doesn't meet modern safety standards. The Dynamo team has gone to great lengths to make sure our children know the joy we lived when we were their age, but safely. Our Apollo, Allegro and Astro structures bring back the spinning sensation of the merry-go-round, but use revolutionary technology to limit rotational speed and the use of our unique ropes instead of steel makes them completely safe. We've even improved on the traditional swing! Our Biggo swing can be shared with three friends safely, protected by Dynamo's industry-changing safety bumper. After all, laughter is meant to be shared, and real fun is contagious.

While kids want to have fun, parents want them to be safe, and communities want to know they are making the best choices they can. Every single person on the Dynamo team is completely committed to meeting these expectations. Our structures fuel laughter and imagination, but they are also the safest in the world. Their beauty, legendary durability and complete compliance to CSA, ASTM, EN standards, and IPEMA & TUV certification, make them right for every park setting.

Try them! Come and play! Then you'll know!
